

ABSTRACTS Listed by presenting author in alphabetical order

- Ait Ghezali L.** (France): SERCA expression defects in choroid plexus neoplasia. **048**
- Al-Mawla R.** (France): Expression and localization of the TRPV1 cation channel in mouse cardiomyocytes and skeletal muscle cells **002**
- Antos C.L.** (Germany): The calcium-regulated phosphatase calcineurin regulates coordinated outgrowth of all tissue progenitor cells of regenerating zebrafish appendages. **021**
- Asghar M.Y.** (Finland): TRPC1 channel knock-down attenuates the expression of receptors involved in migration of ML-1 cells. **047**
- Astegno A.** (Italy): Structural plasticity of calmodulin on the surface of CaF₂ nanoparticles preserves its biological function. **012**
- Aulestia F.J.** (France): Cancer stem cells: Ca²⁺ influx through store-operated Ca²⁺ channels. **038**
- Azimi I.** (Australia): Calcium signalling in hypoxia-induced epithelial–mesenchymal transition in breast cancer cells. **042**
- Becker M.** (Germany): F-actin inhibitor induced intracellular influx of calcium across the plasma membrane of B cells requires expression of IgD. **056**
- Bernard D.** (France): Endoplasmic reticulum calcium release through ITPR2 channel leads to mitochondrial calcium accumulation and senescence. **035**
- Bogeski I.** (Germany): The role of Orai1 and STIM2 in primary human melanocytes and melanoma. **044**
- Böhler P.** (Germany): Induction of Ca²⁺ flux and apoptosis by the mycotoxin Phomoxanthone A. **079**
- Böhm J.** (France): Tubular aggregate myopathy is caused by mutations in the calcium sensor STIM1. **016**
- Bresson-Bepoldin L.** (France): Localized store-operated calcium influx represses CD95- dependent apoptotic effects of Rituximab in Non-Hodgkin B lymphomas. **045**
- Bultynck G.** (Belgium): More than apoptosis: Bcl-2 targeting and controlling ryanodine receptors. **078**
- Chehab T.** (UK): Inhibition of INSP₃ receptor signalling induces autophagy. **022**
- Combettes L.** (France): Shigella invasion of epithelial cells induces cytosolic long lasting local calcium responses. **081**
- Deb B.K.** (India): Drosophila septin, PNUT is a modulator of neuronal store operated calcium entry. **086**
- Dellis O.** (France): From store-operated calcium entry effector to cell killer. **082**
- Diercks B.-P.** (Germany): High spatio-temporal resolution Ca²⁺ imaging in T cells during immune synapse formation. **020**
- Fajardo V.A.** (Canada): Phospholamban overexpression causes skeletal muscle myopathy and is more prominent in female mice. **011**
- Falk H.** (Denmark): Calcium electroporation for treatment of cutaneous metastases; a randomized double-blinded phase II study. **068**
- Fliegert R.** (Germany): Activation of TRPM2 by adenosine 5'-diphosphoribose: structure-activity relationship. **073**
- Frandsen S.K.** (Denmark): Calcium electroporation of spheroids induce cell death in cancer cell lines, not a normal cell line. **069**
- Gargus J.J.** (USA): Functional defects in calcium signaling as a diagnostic tool autism spectrum disorder. **030**
- Gattkowski E.** (Germany): Analysis of elementary Ca²⁺ signals in T-Lymphocytes evoked by microinjection of NAADP. **071**
- Gellerich F.N.** (Germany): Tissue specific differences of mitochondrial gas pedal: cytosolic Ca²⁺ regulates the mitochondrial energization with pyruvate. **085**
- Gherardi G.** (Italy): The role of the Mitochondrial Calcium Uniporter in the control of skeletal muscle mass. **062**
- Gkika D.** (France): Identification and characterization of a novel protein family as a new component of TRPM8 regulation and its implication in cancer. **039**
- Guéguinou M.** (France): Channel complex SK3/Orai1/TRPC1 promoting colorectal cancer cell HCT116 motility: effect of Cetuximab and AKT/Rac1 pathways. **050**
- Guido D.** (Switzerland): Junctional drives ER-Phagosome membrane contact site formation that promotes periphagosomal Ca²⁺ microdomains. **057**
- Hammadi M.** (France): Fluoxetine induces early necrosis by respiratory chain inhibition and mitochondrial Ca²⁺ overload in lymphocyte cell lines **003**
- Hegedus L.** (Hungary, Austria): The role of the plasma membrane Ca²⁺ pump PMCA4b in Ca²⁺ homeostasis and migration of BRAF mutant melanoma cells. **043**
- Heister P.M.** (UK): Glucose and NAADP trigger elementary intracellular Ca²⁺ signals in pancreatic β-cells. **034**
- Himschoot E.** (Belgium): The involvement of calcium in auxin-regulated PIN endocytosis. **075**
- Hübner K.** (Germany): Phenotype and function-specific Ca²⁺ dynamics in primary human neutrophils. **055**
- Ivanova H.** (Belgium): The C-terminal transmembrane domain of Bcl-2 is essential for its inhibitory function on IP₃R channels. **074**
- Krizanova O.** (Slovakia): Role of individual types of the IP₃ receptors in cancer. **038**
- La Cour J.** (Denmark): A cardiac arrhythmia causing CaM mutant is unable to fully activate CaMKII due to its inability to induce phosphorylation of novel sites **006**
- Leclerc C.** (France): TRPP2-dependent Ca²⁺ signaling in dorso-lateral mesoderm is required for kidney field establishment in Xenopus. **072**
- Leclerc E.** (USA): RAGE Modulates the expression of S100 proteins in melanoma tumors. **067**
- Lesniak W.** (Poland): Changes in S100 proteins expression during keratinocyte differentiation. Effect of S100A6 on epidermal growth. **009**
- Lueck K.** (UK): Regulation of epithelial cell phenotype by annexin A8 and Wnt signalling. **001**

Magnusson M. (Finland): TRPC1 as a regulator of migration and proliferation of follicular ML-1 thyroid cancer cells. [046](#)

Maki M. (Japan): Identification of novel Ca²⁺-dependent ALG-2-interacting transmembrane proteins by search based on a newly defined binding motif. [080](#)

Marino V. (Italy): Structural effects of Mg²⁺ on the regulatory states of Neuronal Calcium Sensors operating in vertebrate phototransduction. [023](#)

Markova J. (Slovak Republic): Sodium/calcium exchanger is upregulated by sulfide signaling, forms complex with the β 1 and β 3 but not β 2 adrenergic receptors. [037](#)

Miller A.L. (China): Knock-down and rescue of TPC2-mediated Ca²⁺ signaling required for myofibrillogenesis in zebrafish slow muscle cells. [008](#)

Myeon J.Y. (Korea): Identification of membrane targeting domain of TRPC4 channel irrelevant to its formation of tetrameric structure. [066](#)

Nammalwar R. (Germany): A novel trimeric complex of S100P, Ezrin and IQGAP1 and their mutual regulation. [076](#)

Néant I. (France): Kcnp1 a Ca²⁺-dependent transcriptional repressor regulates the size of the neural plate in *Xenopus*. [028](#)

Nita I.I. (Israel): Functional interplay between Na⁺ channels and mitochondrial Ca²⁺ transporters controls the global Ca²⁺ dynamics and oxidative metabolism in pancreatic β Cells. [063](#)

Nurbaeva M.K. (USA): A novel mechanism for Ca²⁺ uptake by enamel forming cells. [054](#)

Paggio A. (Italy): Control of mitochondria morphology by CCDC51. [061](#)

Paudel R.C. (Belgium): AMPK- and Beclin 1-independent autophagy induced by resveratrol needs intracellular Ca²⁺ signalling. [053](#)

Pejic M. (Germany): Ca²⁺-dependent membrane organization mediated by annexin A2. [083](#)

Pereira G.S.J. (Brazil): NAADP mediated Ca²⁺ signaling and regulates autophagy glutamate- induced in astrocytes. [077](#)

Perez-Rosas N.C. (Mexico): A new type of kinetics explains calcium release via Ryanodine Receptors in smooth muscle cells: mathematical modeling approach. [052](#)

Peters A.A. (Australia): PMCA2 in human breast tissue with lactational change and in human breast cancer cells. [036](#)

Poser E. (Italy): Sorcin links cell cycle, calcium levels in endoplasmic reticulum and multi drug resistance in cancer. [087](#)

Pulli I. (Finland): Sphingosine kinase 1 modulates calcium signaling in a compartment-specific manner. [049](#)

Rietdorf K. (UK): Spontaneous Ca²⁺ signalling and ultrastructural changes in pulmonary vein sleeve cells during ageing – risk factors for AF? [010](#)

Ring A. (Norway): Inhibition of high voltage activated Ca²⁺ channels by polyunsaturated fatty acids. [025](#)

Romanov R. (Sweden): A secretagoginergic locus of the mammalian hypothalamus controls stress hormone release [004](#)

Rychkov G. (Australia): The role of TRPM2 channels in paracetamol-induced liver damage. [070](#)

Säuc S. (Switzerland): Characterization of the trafficking and functional properties of the long STIM1 isoform. [058](#)

Schacht T. (Germany): NECAB2: characterization of a calcium-binding protein [005](#)

Schenten V. (Luxemburg): Dual functions of S100A8/A9 in inflammation: focus on NADPH oxidase regulation and autocrine signalling in neutrophils. [018](#)

Schoenauer R. (Switzerland): Acid sphingomyelinase mediates the repair of toxin-damaged plasmalemma by regulating microvesicle shedding. [027](#)

Scholten A. (Germany): Diversity of recoverins in zebrafish rod & cone photoreceptor cells. [024](#)

Simpson A. (UK): Distribution of Ca²⁺ channel isoforms in HaCaT keratinocytes. [017](#)

Sorrentino V. (Italy): Molecular basis of sarcoplasmic reticulum organization in skeletal muscle fibers. [059](#)

Sorrentino V. (Italy): A mutation in the CASQ1 gene causes a vacuolar myopathy with accumulation of sarcoplasmic reticulum protein aggregates. [060](#)

Strehler E.E. (USA): Intestinal deletion of PMCA1 leads to calcium malabsorption, secondary hyperparathyroidism and reduced bone mineral density. [034](#)

Sulmann S. (Germany): Impact of myristoylation and Mg²⁺ on Ca²⁺-sensing properties of zebrafish GCAPs. [014](#)

Tennakoon S. (Austria): Calcium Sensing Receptor signalling in colon cancer cells. [013](#)

Vardjan N. (Slovenia): Distinct dynamics of intracellular [Ca²⁺]_i and [cAMP]_i upon adrenergic receptor stimulation in single rat astrocytes. [029](#)

Varga K. (Hungary): Differential effects of histone deacetylase inhibitors on the expression of PMCAs in breast tumor cells. [041](#)

Vervloessem T. (Belgium): Targeting mitochondrial- and endoplasmic reticulum-Bcl-2 to induce apoptosis in cancer cells. [040](#)

Wacquier B. (Belgium): Modeling approach of calcium signaling and mitochondrial metabolism during cellular invasion by *Shigella*. [051](#)

Webb S.E. (China): An exploration of Ca²⁺ signaling during heart development in zebrafish [007](#)

Wegierski T. (Poland): Impaired secretion of sAPP α under high extracellular Ca²⁺ conditions. [032](#)

Wie J. (Korea): RASD1 regulates activation of TRPC4 via G α i independent of G protein coupled receptor. [064](#)

Williams C.J. (USA): Involvement of T-type channels in accumulation of calcium stores in mouse eggs. [065](#)

Wojda U. (Poland): Ca²⁺-binding Calmyrin 2 interacts with Rab proteins and regulates endocytosis. [019](#)

Wolfmeier H. (Switzerland): Ca²⁺-dependent repair of pneumolysin pores: a new paradigm for host cellular defense against bacterial pore-forming toxins. [026](#)

Yapa K. (Australia): Effect of ATMB, a pharmacological modulator of TRPM8 on breast cancer cell proliferation. [033](#)

Zhang S.L. (USA): STIM1 and Orai1 mediate histamine-evoked calcium entry and NFAT signalling in human umbilical vein endothelial cells. **015**

Zorec R. (Slovenia): Bioactive sphingolipids and calcium homeostasis in cultured rat astrocytes. **031**
